

## **ABSTRACT**

An object of the present invention is to fairly reproduce the irregular surface of a shaped sheet for a cast resin film and a production method having high productivity. In order to attain the above object, the present invention provides a shaped sheet provided with a releasable resin layer having a transfer pattern formed of an irregular shape on one side of a substrate sheet 1, wherein a flat portion of the transfer pattern is formed of a fine irregular surface having an arithmetic average roughness Ra of 30.0 to 1.5  $\mu$  m.
